Business Intelligence

A powerful web-based reports dashboard delivering real-time engineering metrics - extracted from your own Mainsaver data!

Your information is displayed in easy-to-read formats that show exactly how your team is performing. Drill-down functions enable you to identify the root causes of any recurring issues.

- Gives maximum benefit from your valuable Mainsaver data
- Affordable and simple to deploy
- Web-enabled for site-wide, unlimited-user access
- Minimal set-up time and training required
- Quick, straightforward access to the information you need
- Real-time visibility of key performance indicators
- Root-cause fault analysis quickly available via drill-down functions
- Helps quickly identify your opportunities for improvement
